# Mission and Vision

**Blockchain-based financial services with decentralised trading environments and tokenisation.**

Our mission is to protect users' investments in decentralised and centralised environments without storing personal data or managing their digital assets.

Our vision is to tokenise all industries and provide a free digital payment system with financial rewards.

# Business Model

## Innovative ventures

The company offers INFI holders a 60% monthly profit share in USDT and Bitcoin through ventures in Cyber Security, Digital Trading, Web3 Transactions and Metaverse Gaming. We focus on technology and innovation, providing secure solutions within the ©SbSe protocol across different blockchains and industries, our WEB4 concept, INFI eBank and Metaverse-Gaming aim to improve economic prospects.

# The Problem

The cryptocurrency industry faces several significant challenges:

## **Scams**

High levels of fraudulent activity undermine confidence

## **High fees, volatility, market manipulation**

Transaction fees can be prohibitive. Market volatility creates an unstable trading environment

## **Lack of transparency, security issues**

Centralised and decentralised exchanges (CEXs & DEXs) often lack transparency. Current blockchains have significant security vulnerabilities, especially in transactions, resulting in financial losses.

A background image showing several interlocking puzzle pieces. One piece prominently features a large blue dollar sign (\$), and another piece to its right has the word "SOLUTION" written in blue capital letters. The pieces are set against a light grey background with faint puzzle piece outlines.

# The Solution

The innovative ©SbSe protocol, tokenisation, cryptocurrency exchange, digital hybrid eWallet, blockchain-based eBank

## **Security and Transparency**

Provides robust cyber security measures and full transparency through the SbSe PFP profit pool and Smart Watch account. Ensures cost effective transactions. SbSe protocol automates fees and reward structures

## **MultiChain integration, special liquidity management**

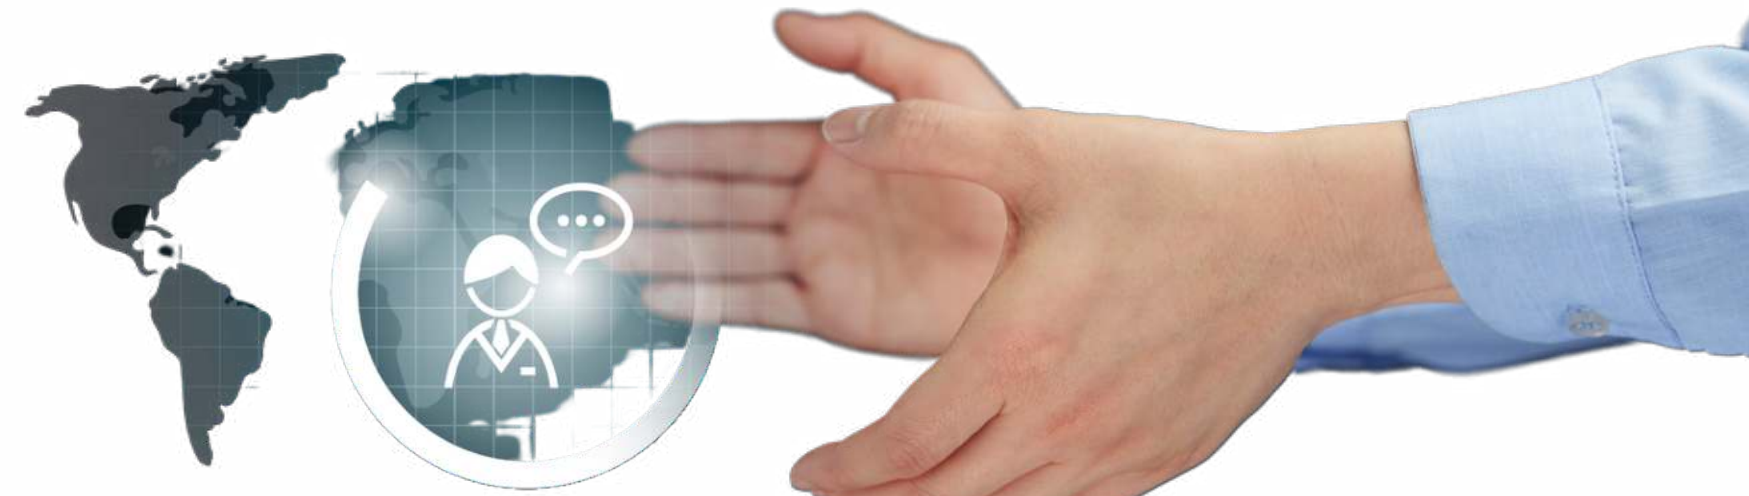

Seamless trading across blockchains via the SbSe Liquidity Hub with a 48-hour fraud compensation scheme. SbSe protocol governs trading and money flow.

## **Innovation**

The ©SbSe protocol is a notable innovation in blockchain tokenisation and cryptocurrencies, designed for autonomous ecosystem operation, improved transaction security and speed, user incentives and system transparency.

# Our offered services

INFI MultiChain CDEX Crypto Exchange, Blockchain, Financial Services,  
Gaming, Metaverse,

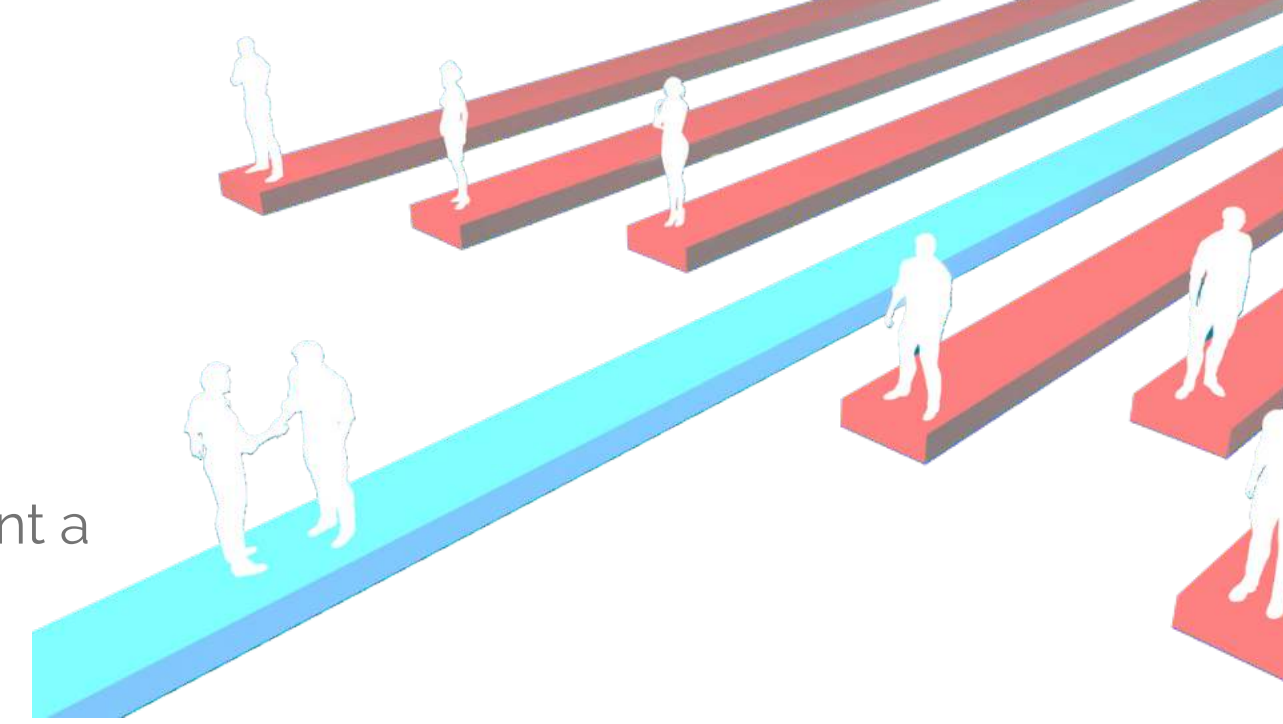

## **INFI CDEX Exchange, INFI Digital Hybrid eWallet, INFI eBank, Gaming**

Powered by the world's first self-building smart ecosystem, the ©SbSe protocol, the INFI CDEX MultiChain Exchange provides a range of services for cryptocurrency projects, ICOs, staking rewards, along with unique liquidity management and a swap-trade-earn model. The platform features the INFI Launchpad on six blockchains with an automated listing process overseen by the protocol. It also includes the INFI Digital Hybrid eWallet and INFI eBank, creating a new digital payment system (DpS) for both financial institutions and individuals. The InvertX Stable Coin model offers free services with cash back and passive income rewards supported by the ©SbSe protocol. Through our gaming concept, we offer practical applications in the real estate sector for individuals, leisure facilities and cryptocurrency projects. INFI Blockchain and the ©SbSe Protocol serve organisations, individuals and the financial sector, and are leading the way for tokenisation in the blockchain space.

# Competitive Advantages

At Inverted Investment, we transcend the traditional boundaries of a company; we represent a collective of forward-thinking individuals and pioneers.

## ©SbSe Protocol

Overseeing the entire ecosystem means not only prioritising users' financial well-being, but also ensuring unparalleled stability and security to protect against manipulation and fraud.

## Decentralized Transparent and Secure

No storage of digital assets or wallet keys ensures user privacy, company revenue and sales visibility. Secured by the ©SbSe protocol and cyber security companies.

## Inclusive Ecosystem

Designed to be environmentally friendly, reduce costs with SbSe Liquidity HUB and protect transactions with SbSe Safe Track.

## Passive Income Rewards

Our believers receive 60% of the company's profits on a monthly basis, paid promptly in stable coins and bitcoin.

# Indirect Competitors

Thanks to unique concepts, we have no direct competitors... what makes us different?

## Decentralized & Centralized Platforms

- State-of-the-art ©SbSe protocol
- Secure and stable trading platform
- Strong financial incentives
- Attractive swap trade earn cash back model
- Dedicated liquidity management
- User privacy protection
- Transaction security
- User friendly environment

## Financial Institutions

- Innovative approach to collateral lending
- Distinctive stable coin concept
- Customised liquidity management
- Tokenisation across multiple industries
- User-friendly and transparent interface
- Financial incentive structure
- Blockchain-based eBank concept

# Revenue Streams

## The INFI Ecosystem

The ©SbSe protocol includes a sophisticated mechanism that autonomously regulates fees throughout the ecosystem without the need for human intervention.

## Tokenization

The ©SbSe protocol also plays an important role in the tokenisation process on the INFI blockchain, which leads to huge profits for companies. "Tokenisation starts with INFI..."

## The InvertX Stable Coin

Aligned with the ©SbSe protocol, it has a distinctive arbitrage model within the INFI ecosystem. Our stable coin aims not only to provide our services free of charge, but also to ensure our attractive cash-back and reward system for every user.

# The Team

## Odon Oszkar Horvath

CEO / Founder

" We focus on transparency, security, user financial benefits and user empowerment".

## Sven Schonwald

COO

"Excited about utilizing blockchain and artificial intelligence to enhance offerings."

## Eva Meggyesi

Co-Founder

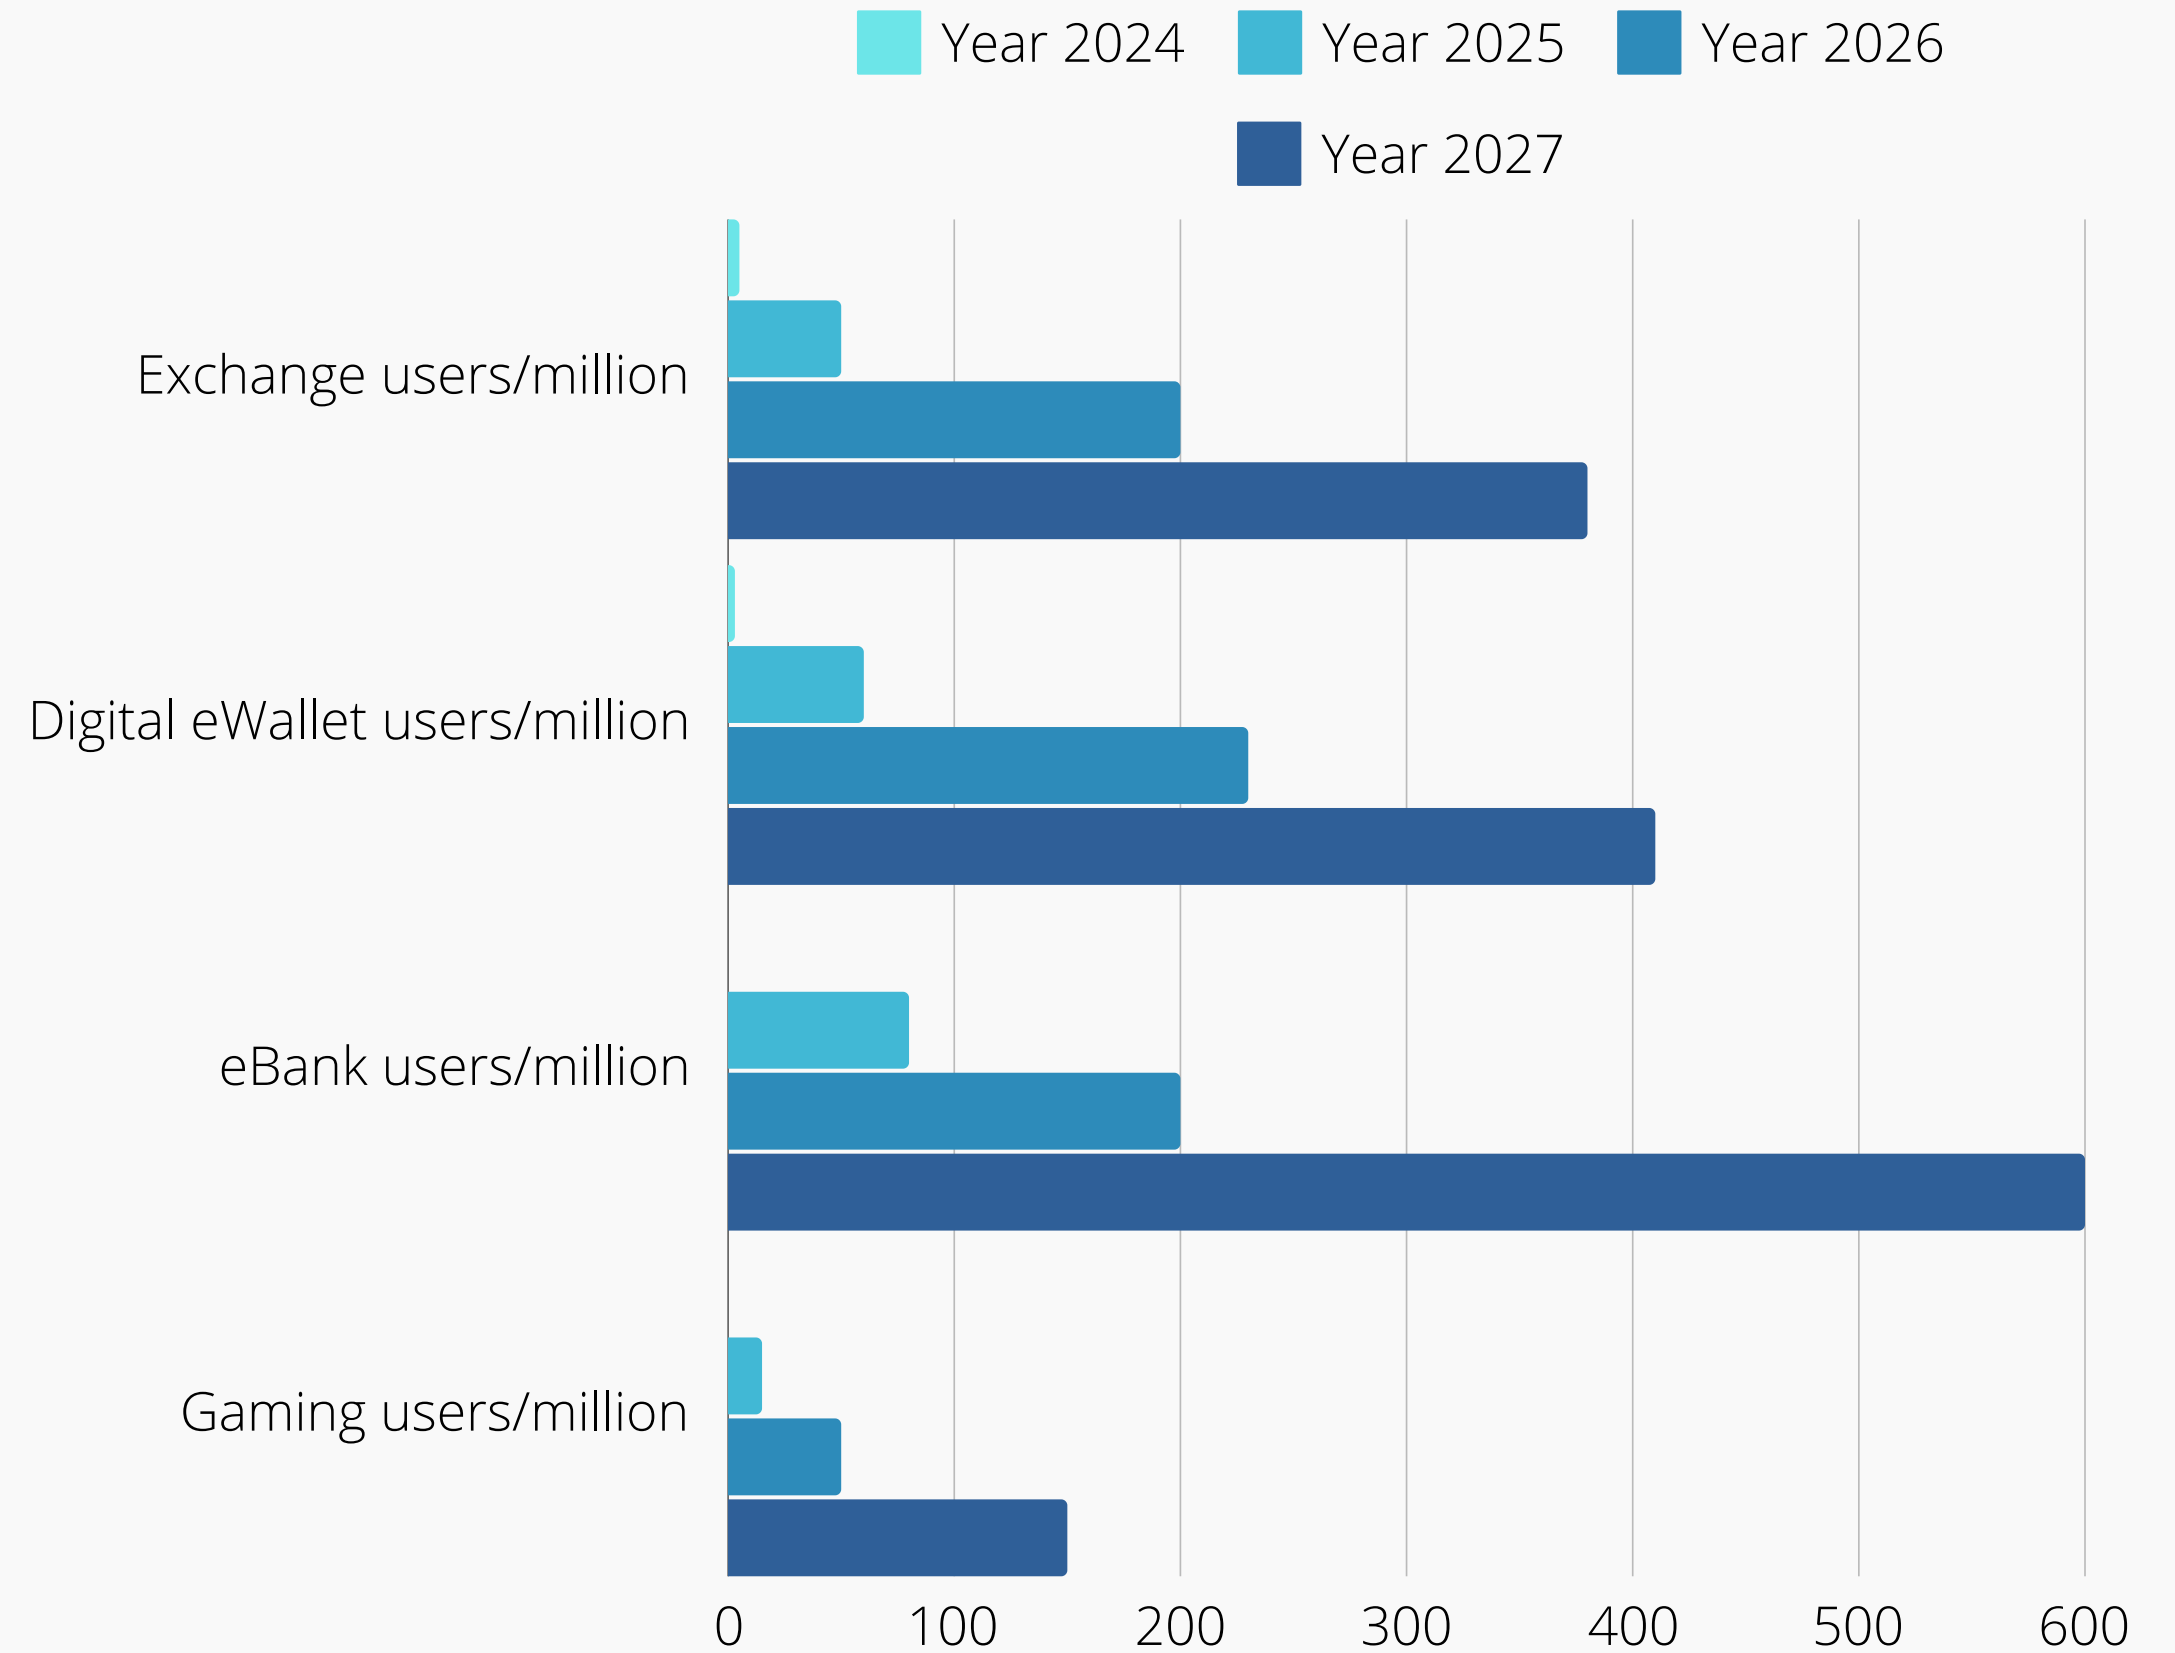

"Tokenisation across all industries is the key to the future."

# Target Market Opportunity

## Millions of users worldwide.

Our target market consists of cryptocurrency and blockchain enthusiasts, as well as online banking users worldwide.

# Traction/Milestones

## Q3 2023 - Q3 2024

Development and deployment of smart contracts for key INFI CDEX and ©SbSe protocol functionalities.

## Q3 - Q4 2024

Launch of INFI MultiChain CDEX Exchange and completion of INFI ICO. Full implementation of ©SbSe protocol and launch of additional projects

## Q4 2024 - Q1 2025

Incorporation of INFI MultiChain CDEX Exchange in Dubai and acquisition of operating permits, licences

## Q1 - Q4 2025

Introduction of INFI Digital Hybrid eWallet integration with traditional banking features and InvertX Stable Coin

## Q4 2025 - Q4 2026

INFI MultiChain CDEX Exchange, INFI Coin, INFI Digital Hybrid eWallet Migration to INFI Blockchain, WEB4 Concept and INFI eBank Integration. "Wear to Earn" ICO Launch for the Metaverse Game

# The Investment / Use of Funds

To support our expansion and achieve our goals, we are actively seeking investors for our primary token sale of INFI ICO and/or equity investors in our main company. Inverted Investment LLC is a legally registered company based in Miami, USA. Our goal is to secure \$6 million, with a primary focus on completing the first phase of our ICO, which amounts to \$330,000.

## **Company incorporation in Dubai**

The incorporation of the company in Dubai will be finalised following the successful completion of the first phase of the INFI ICO. Establishing our headquarters in Dubai is of paramount importance. Dubai has already made remarkable strides in tokenisation and pioneering digital blockchain-based payment systems.

## **Further developments and INFI Liquidity**

We are allocating \$3.5 million for further development to enhance the INFI MultiChain CDEX Exchange, INFI Digital Hybrid eWallet, INFI eBank, INFI Blockchain, InvertX Stable Coin and gaming developments.

## **Treasury. Marketing and the ©SbSe Protocol**

We are allocating approximately \$2.5 million to our treasury. Our treasury consists of precious metals, stable coins and funds earmarked for the tokenisation of real estate assets in connection with our Metaverse Game project.
